

Dear FCC Members;

I am outraged at the proposed changes in ownership rules for our media and at the way it is being done, without MAJOR public discussion of such a key issue. What is the rush?... other than stopping the public outcry?.

Anybody who has travelled outside the US and seen foreign media for a while can clearly tell how biased and uniform the US media has become. This proves that even though there may be Internet and many channels, THE VAST MAJORITY OF THE US PUBLIC GET THEIR VIEW OF THE WORLD FROM A HANDFUL OF NETWORKS!. This has become in my mind one of the greatest threats to our democracy. The proposed changes in the rules are just going to make this situation much worse. Isn't that obvious to you?.

Please do not allow owners to own more stations than is currently allowed. These are PUBLIC airwaves, not corporate property and the FCC is commissioned to defend the public interest!. Do not allow information to be limited to a conglomeration of corporate interests trying to serve themselves first and monopolize opinions.

Thanking you in advance for your denial of changes in the Percentages allowed under current rules.

Sincerely,  
Carl Kohan

Question: does the FCC truly care about the opinions of the American public, or is it listening just to special interests?. We will see soon...
